

**Thursday, April 26, 2007**  
**5:00 p.m. – 7:00 p.m.**

Hosted by:  **coderefinery**

You're invited to our next networking event for business development professionals in North Carolina's life sciences companies, universities and governmental organizations. Our program host will be Code Refinery. Code Refinery specializes in implementing and validating software applications where FDA compliance is crucial. These systems are used in applications for Clinical Diagnostics, Infectious Disease Screening, Drug Discovery and Development and in Medical Devices.

This event is open only to senior business development professionals in North Carolina's biotechnology, pharmaceutical, diagnostic, medical device, and agricultural and veterinary organizations. Each meeting provides the opportunity to:

- Expand contacts with companies making investments and form partnerships in our industry
- Learn benchmark terms of recent licensing deals
- Get names of companies serving as beta sites for new technology applications and products
- Develop insights into partnership management issues and how to manage them

There will be a brief welcome and overview from Code Refinery management. Traditional networking, announcements and open discussions will follow. Refreshments are compliments of our host. Information about our host and directions to the event follow.

**Steering Committee**

*Dennis Burns, TCG (dennis@t-c-group.com)*

*Gregg Davis, GlaxoSmithKline (gregory.j.davis@gsk.com)*

*Andrew DiMeo (ajdimeo@gmail.com)*

**Please RSVP to [LSBDP@ncbiotech.org](mailto:LSBDP@ncbiotech.org)**  
**no later than April 20, 2007.**

## **ABOUT OUR HOST**

Code Refinery develops and validates systems in fields where regulatory compliance and safety are essential and system failure is not an option. By taking a comprehensive approach, we build solutions that integrate seamlessly into your existing environment and adapt to your future business needs. Since starting in 1997, we have built a solid track record with customers such as Bristol-Myers Squibb, Gen-Probe, bioMerieux, Baxter Healthcare and Eli Lilly.
